

Dr. Vasile Palade is currently working with the Computing Laboratory, Oxford University, UK. His main research interests lie in the area of computational intelligence and encompass hybrid intelligent systems, neural networks, fuzzy and neuro-fuzzy systems, various nature inspired algorithms (genetic algorithms, swarm optimization), ensembles of classifiers. Application areas include a wide range of Bioinformatics problems, fault diagnosis, web usage mining, process modelling and control, among others.

Before joining the University of Oxford, Dr. Palade worked as a research associate with the Department of Engineering, University of Hull, UK, and as Associate and Full Professor of the Department of Computer Science and Engineering, University of Galati, Romania.

Dr. Palade is author and co-author of more than 70 papers in journals and conference proceedings as well as few books on computational intelligence and applications. He also edited few books and conference proceedings.

He currently serves as Co-Editor-in-chief for the International Journal of Hybrid Intelligent Systems, as Associate Editor for the International Journal on Artificial Intelligence Tools and for the International Journal of Knowledge-Based Intelligent Engineering Systems, and as a member in the editorial board for several other journals. He regularly serves as an organizer or Programme Committee member for many international conferences on machine learning and intelligent systems. He was the General Chair for KES2003 – The 7th International Conference on Knowledge Based Intelligent Engineering Systems, Oxford, 3-5 September, 2003. Dr. Vasile Palade is an IEEE Senior member, and a member of the IEEE Computational Intelligence Society.
