

Paper ID	Paper Title	Authors
282	Reggie Papers	
282	Multimodal Foundation Models for Zero-Shot Winter Storm Forecasting in Precision Agriculture	seyed hamidreza nabaei (University of virginia)*, Zeyang Zhang (University of virginia), Dong Chen (University of virginia), Arsalan Haydariyan (University of virginia)
379	Frontal Learner for Industrial Anomaly Detection: Towards Generalizable Multimodal Defect	YIN HAN CHANG (National Center for High-performance Computing National Applied Research Laboratories)*, Pailin Mehta (National Institute of Informatics), Yi-Lun Fan (National Center for High-performance Computing Department of Computer Science), Vincent S. Tung (National Yang-Ming Chiao Tung University)
548	A Multimodal Machine Learning Approach for Solar Flare Prediction using Priority Inversion Lines Data	Zhae Kheng (Georgia State University)*, Rana Mansouri (Georgia State University), Berkay Aydin (Georgia State University)
634	Background-Aware Instance Segmentation for Early Detection of $E. coli$ and <i>Salmonella</i> in Time-Dumped Microscopy Images	Blank Karady (Southern Illinois University Carbondale), Aree Alsalabi (Southern Illinois University Carbondale)*, Haining Shao (Southern Illinois University Carbondale), Amer Aladhaishi (Southern Illinois University)
663	Privacy-Preserving Multimodal Stress Detection from Headsets with Attention Fusion and Federated Learning	Mohd Farhan Iqbal Soomro (Southern Illinois University Carbondale), Elaysha Nagendrababu Nera (Southern Illinois University Carbondale), Nouran Zengari (Dean University)*, Pineda Himes (Florida Atlantic University), Abdul R. Shahid (Southern Illinois University Carbondale)
688	LoCoP: Jailbreaking Vision-Language Models via Loss-Guided Image Perturbation	Md Latif Mia (Florida International University)*, M. Hossain Amee (Florida International University)
690	Characterizing the robustness of multi-modal AIs and image models for visual image classification	John Thomas (GSX Research Laboratories)*
676	Plask: Edge-Only, Adapter-Tuned Multimodal Small Language Model for Safe, Real-Time In-Vehicle Dialogue	Alex Firoozee MAH (Dubai)*, Valad Tawfik (Dubai), Luis Enemorado (FIO), Carlos Carrizo (FIO), Miguel Garcia (The University of Texas Rio Grande Valley), Niki Pitsireos (FIO)
696	Morphological-Inspired Optimization with Deep Learning for submillimetric particle segmentation in petrographic microscope images	Tahmid Arshad Bin Hossain (Southern Illinois University Carbondale)*, Md Gislam Khara (Shenandoah State University), MD Rezaul Haqueem (Southern Illinois University Carbondale)
